

Impact Report

Summer at Girls Inc. 2023

Camps provide girls with the opportunity to strengthen academic and life skills. They prepared for leadership, advocacy, higher education, and satisfying work. They also had a lot of fun.

This summer, girls learned to create a business and present it to local entrepreneurs at the "Shark Tank Event". They built robots, learned about motion and sound, made presentations on issues they care about, visited college campuses, worked with corporate mentors, and visited local corporations.

See Smart Ups in action

450 girls participated in one of the 12 summer camps available for girls from kindergarten to college.

The Melinda Hoag Smith Center for Healthy Living hosted 7 Girls Inc. summer camps.

Eureka! middle school summer camp was held at Orange Coast College and Samueli Academy. See Eureka! in action

Over 60 volunteer mentors, including Duke University STEM students, participated in Girls Inc. summer camps.

Girls participated in a career panel and tour at **Edwards Lifesciences**, including a demonstration on the creation of a heart valve.

127, 11th grade girls were matched with 127 corporate mentors for a Girls Meet the Workforce summer externship.

25 Host sites participated including corporations, non-profits, government agencies, and female owned-businesses.

Four of the host sites hosted 10 or more externs! A special thanks to all host sites for helping to prepare girls for the world of work!
